

Industrial Engine Sensors - Fluid T° - MBT2**MBT2 FLUIDS AND GAS TEMPERATURE
SENSOR****MBT2**

The MBT2 is a RTD/Pt100 (Pt1000) temperature sensor designed and constructed specifically for measuring industrial engine fluids temperatures such as industrial lube oil, diesel oil, heavy fuel oil, supply gas, raw water or treated water.

// Description

The MBT2 series is one of CMR's standard temperature sensor models for marine, diesel or industrial applications for oil, water and fuel temperature measurement.

Designed with a pocket for installation on pipework, its multi-contact connector ensures rapid maintenance without risk of connection errors.

// Specifications

• Sheath	-
• Element	PT100
• Insertion Length (mm)	60
• Process Connection	M18
• Elbow	-
• Cable Length (m)	-
• Electrical Connection	F1
• Outlet	-
• Measurement Range	- 50°C / + 200°C

Industrial Engine Sensors - Fluid T° - MBT2

// Applications

DEFENSE - ARMY

DEFENSE - NAVY

INDUSTRY & UTILITIES - PROCESS INDUSTRIES

INDUSTRY & UTILITIES - HAZARDOUS & MACHINERY

POWER - ENGINES & GENSETS

TRANSPORTATION - LAND

TRANSPORTATION - MARINE
